Gary,
Will you move this through?

Subject: Pleasant View Request for Non-Production Well

Ross and Jim,

Please find attached a Request for Non-Production Well for Pleasant View City. This well will test the alluvial and bedrock aquifer at this location. The well will also test the interference between this site and the Pleasant View Alder Creek Well.

Sorry for the short notice, but the Drillers are actually coming up this week. The driller will be Yellow Jacket Drilling (872), and this will be their first hole in Utah, so the city is keeping their fingers crossed.

If possible could you email me the applicants and drillers copies as soon as possible so I can get it to Yellow Jacket.

Thank you,

John
